1916

Payroll Rules for Compensation Policies.

Amend the first paragraph, page 7 of the Manual to read:

The Compensation rates in this Manual shall be applicable to the remuneration of all employees of the assured without exception, and also to the entire remuneration of employees of sub-contractors, which remuneration may be divided into classifications where specifically permitted or directed by these rules, but not otherwise (if the assured cannot furnish the remuneration of employees of sub-contractors, one-third of the contract price of the sub-contracted work shall be considered as the remuneration of employees of sub-contractors). No premium charge, however, shall be made on the remuneration of the employees of any sub-contractor, if the assured shall furnish the Company with a certificate showing conclusively that such sub-contractors have maintained compensation insurance covering their entire liability for compensation during the period that the compensation policy of the assured was in force. Under no circumstances shall a compensation policy be written on any part of a plant leaving another part of the plant uninsured. The following specific rules shall govern the treatment of payroll as the basis of premium for compensation policies.

Division of Payroll.

Amend paragraph "1" page 7 of the Manual, to read:

The operative procedure within a given plant shall not be subject to division into several manual classifications where the employees are engaged, or the different operations are conducted in such a manner that they are all brought together, the employees being commonly exposed to the general hazard of the enterprise which is best represented by its governing classification. Under such circumstances, the place of the work of the employees is such that they are subjected to the common hazard whether or not the employees are interchangeable and the governing classification must apply to all without sub-division.

If, however, there are *distinct enterprises*, conducted in a given plant by the same employer and the *entire work in each enterprise* is conducted either in a *separate building* or on a *separate floor or floors of a building*, or on the *same floor in separate departments divided by partitions without interchange of labor*, the employer conducting each of such enterprises as a *separate undertaking* with *separate records of payroll*, then such separate undertakings shall each be classified according to the Manual and the proper premium rate applied to each. *Any operation, normally prevailing in the business covered by the governing classification as defined, cannot be treated as a separate enterprise within the meaning of the rule.*

Exceptions—General Rules (Continued.)

Estimated Wages.

Amend the rule page 6 of the Manual, under the above heading, by adding the following paragraph:

There shall be incorporated in every compensation policy a provision for the inclusion of minimum amounts in computing wages to represent the value of board or lodging furnished by the employer, said amounts to be not less than the following:

Where board only is furnished.....\$12.50 per month.

Where lodging only is furnished..... 3.50 per month.

Where both board and lodging are furnished ... 16.00 per month.

Executive Officers.

Amend the second paragraph of section 3, page 8 of the Manual to read:

1. The inclusion or exclusion of any executive officer or officers or members of a co-partnership or individual employers from the coverage of the policy shall be optional with the carrier, but such inclusion or exclusion must be plainly stated in the policy.

2. If included in the coverage of the policy the premium basis for such executive officer or officers, members of a co-partnership or individual employers must be stated in the payroll; but not in excess of \$1,666.66 each.

3. The rate to be charged for such executive officer or officers, members of a co-partnership or individual employers shall be the rate of the governing classification in the event that such individuals are exposed to the operative hazard of the business. If not so exposed the rate shall be as expressed in the Manual for clerical office employees.

Add additional paragraph No. 13, to "Payroll Rules for Compensation policies," page 11 of the Manual:

Section 30 of the California Workmen's Compensation Law provides that the general or principal contractors shall be responsible for compensation to employees of sub-contractors. In view of this the compensation rates in this Manual shall be applicable to the entire remuneration of employees of sub-contractors, except that no premium charge shall be made on the remuneration of the employees of any sub-contractor, if the general or principal contractor shall furnish the Company with a certificate showing conclusively that such sub-contractors have maintained compensation insurance covering their entire liability for compensation during the period that the compensation policy of the principal or general contractor was in force. If the principal or general contractor cannot furnish the remuneration of employees of

Exceptions—General Rules (Continued.)

sub-contractors, one-third of the contract price of the sub-contracted work shall be considered as the remuneration of employees of sub-contractors.

The above rule shall not apply to contracts for piecework in manufacturing plants. In manufacturing plants the entire amount paid for such piecework shall be included as payroll.

Medical Aid.

Insert the following after the first paragraph, page 13 of the Manual:

It is permissible for the insurance carrier to enter into an agreement with any assured having permanent and properly equipped hospital and medical service to pay to such assured for furnishing medical and hospital treatment and service, as is required under the California Act, including transportation charges, an amount not exceeding 10% for classifications applying to construction work and the operation, maintenance and extension of electric light and power and telegraph and telephone lines, and 15% in all other classifications, of the total premium earned by the carrier under the assured's policy at full Manual rates.

Minimum Premiums.

Amend page 15 of the Manual under the above heading by the addition of the following:

	Minimum Premiums
Clerical Office Work Only.....	\$5.00
Mining and Milling.....	25.00
Schools	5.00

CLASSIFICATIONS IN BASIC MANUAL NOT AVAILABLE
IN THIS STATE.

Jams, Jellies and Preserves—preparing (not canneries).

Fruit Preserving—(not canneries).

GENERAL NOTICE.

Rules, Instructions, Rates and Classifications, given in this Manual become effective from date of issue of the state rate sheets attached hereto, for both new business and renewals, and supersede all previous Manual Rules, Instructions, Rates and Classifications promulgated by this Company.

GENERAL INSTRUCTIONS.

Representatives of the Company should read very carefully the rules, classifications, and rates contained in this Manual. No deviations or alterations will be permitted, except as they are promulgated officially by the Company. When changes in this Manual are made, agents will be notified as promptly as possible, and they shall thereupon enter such changes herein, and be governed thereby.

Representatives must be especially careful to see that every portion of the application or proposal for insurance is correctly prepared, as this is the basis of the insurance contract, and any inaccuracy or uncertainty as to the nature of the risk may lead to serious misunderstanding and result in dissatisfaction to the assured, to the Company and to its representatives. Classifications shall be stated as in the Manual, and an estimate of payroll, with the proper premium rate, shall appear in all applications or proposals.

POLICY FORMS.

Any risk which involves the liability of the employer, either for compensation or for damages for bodily injuries to his employees, shall be insured under the form prescribed by the Company with due regard to the specific policy requirements of each state.

It has been the practice of the Company in the past, in some instances, to cover the liability to employees and to the public in a single policy. This practice will entirely cease hereafter except as respects General Liability policies covering private residences and Automobile Liability policies covering private automobiles where such policies do not include an obligation for compensation.

As a result of this change, all forms of General Liability policies are withdrawn as such except as noted.

The "General Liability" form will hereafter be known as the "Owners', Landlords' and Tenants' Public Liability" form, abbreviated to "O., L. and T. Public Liability."

The Public Liability form becomes the "Manufacturers' " or "Contractors' Public Liability" form.

The "Contingent" form becomes the "Owners' or Contractors' Protective Liability" form.

The "Elevator Liability" form becomes the "Elevator Public Liability" form.

The "Teams' Liability" form becomes the "Teams' Public Liability" form.

The "Automobile Liability" form becomes the "Automobile Public Liability" form.

The "Theatre Liability" form becomes the "Theatre Public Liability" form.

ESTIMATED WAGES.

Applications or proposals for compensation or liability insurance, whether new business or renewals, should state as accurately as possible the estimated expenditure for the contemplated term of the policy; and, where obtainable the actual expenditure of wages for the preceding policy or calendar year should also be stated as an indication of the sufficiency of the estimate.

Whenever employees are paid in whole or in part, on the basis of piece work or any basis other than that of time actually engaged in work, or by board, store certificates, merchandise, credits, or any other substitute for cash, such form of payment shall be considered as wages or part wages, to be included in the actual disbursements reported at the time of expiration of the policy upon which the adjustment of premium is made. The statement of wages expended shall not, however, include special reward for meritorious achievements, for discovery, nor pure gratuities, nor the results of voluntary profit-sharing arrangements provided these or any of them are no part of the contract of employment, or the actual consideration therefor.

In states where the Compensation Act permits the insurance of individual employers and members of co-partnerships under Workmen's Compensation policies, premium shall be based upon an estimated wage value of \$1500 for each employer at an increase of 50% over the Manual rate for the classification in which the employer is insured, subject to specific minimum premium per individual employer of \$10.

PAYROLL RULES FOR COMPENSATION POLICIES.

The compensation rates in this Manual shall be applicable to the remuneration of all employees of the assured without exception, and compensation policies shall not be written except upon the entire payroll, which shall be divided into classifications where specifically permitted or directed by these rules, but not otherwise. Under no circumstances shall a compensation policy be written on any part of a plant leaving another part of the plant uninsured. The following specific rules shall govern the treatment of payroll as the basis of premium for compensation policies.

1. DIVISION OF PAYROLL.—The operative procedure within a given plant shall not be subject to division into several manual classifications where the employees are engaged, or the different operations are conducted in such a manner that they are all brought together, the employees being commonly exposed to the general hazard of the enterprise which is best represented by its governing classification. Under such circumstances, the place of the work of the employees is such that they are subjected to the common hazard whether or not the employees are interchangeable and the governing classification must apply to all without sub-division.

If, however, there are *distinct enterprises* (meaning thereby operations which are specifically classified in this Manual) conducted in a given plant by the same employer and the *entire work in each enterprise* is conducted either in a *separate building* or on a *separate floor or floors of a building*, the employer conducting each of such enterprises as a *separate undertaking* with *separate records of payroll*, then such separate undertakings shall each be classified according to the Manual and the proper premium rate applied to each. Any operation, normally prevailing in the business covered by the governing classification as defined, cannot be treated as a *separate enterprise* within the meaning of the rule.

The governing classification of a risk is defined as that classification which carries the largest amount of payroll. This does not include the standard exceptions noted in paragraphs 3 to 12 inclusive.

When a risk is written on a divided payroll basis, the payroll of all employees not specifically classified (such as engineers, watchmen and shipping clerks) must take the rate of the governing classification.

2. "NOT AVAILABLE FOR DIVISION OF PAYROLL".—This expression which is used as a part of certain classifications contained in this Manual, means that the classification so indicated is only available for use when the classification specifically describes the entire operations. Such classification cannot be divided or used as a division of any other classification in the Manual.

This does not apply to the standard exceptions noted in paragraphs 3 to 12 inclusive.

3. EXECUTIVE OFFICERS. "Executive Officers" for the purposes of this Manual shall mean those officers of a Corporation commonly known and styled as President, Vice-President, Secretary or Treasurer, and shall include, in addition thereto, any other executive officers enumerated in and empowered by the Charter or any regularly adopted By-Law of the Corporation and who are elected or appointed and empowered by the Directors. Note "Exceptions" sheet for specific states.

The remuneration of executive officers shall be excluded from the payroll upon which the premium rates are charged unless the duties or practices of such executive officers expose them to any operative hazard of the business, in which case the payroll of such officers must be included at the rate of the governing classification.

4. CLERICAL OFFICE EMPLOYEES shall mean only those whose duties are confined to keeping the books and records of the assured and conducting correspondence, or who are engaged wholly in office work where such books and records are kept or such correspondence is conducted, having no other duty of any nature in or about the assured's premises. The actual remuneration of such clerical office force shall be stated separately in the proposal.

5. **SALESMEN (OUTSIDE), COLLECTORS AND MESSENGERS** shall include all employees engaged in these duties where their principal duties are outside of the plant. The entire remuneration of these employees, including those whose duties take them outside the home state of the assured shall be separately stated in the proposal. Note "Exceptions" sheet for specific states.

6. **DRAUGHTSMEN** whose duties are limited to the office only and who are engaged strictly in that profession in such a manner that they are not exposed to the operative hazard of the plant shall be included with the clerical office employees, the entire remuneration of such draughtsmen being stated in the proposal. If any draughtsmen in the performance of their duties are exposed to any operative hazard of the business, the entire remuneration of such draughtsmen shall be included with the governing classification and subjected to the rate for that classification.

7. **DRIVERS AND DRIVERS' HELPERS** shall include those whose principal duties are performed upon teams in either capacity. The entire remuneration of such drivers and their helpers, including stablemen, shall be separately stated in the proposal and shall be subject to the premium rate provided in this Manual except as to such classifications which specifically direct that the rate for the classification shall also be the rate for drivers and their helpers.

8. **CHAUFFEURS AND CHAUFFEURS' HELPERS** shall include all employees whose principal duties are performed upon or in connection with automobiles in either capacity. The entire remuneration of such chauffeurs and their helpers, including incidental garage employees, shall be separately stated in the proposal and subject to the premium rate provided in this Manual except as to such classifications which specifically direct that the rate for the classification shall also be the rate for chauffeurs and their helpers.

9. **BLASTING**—The classifications in this Manual include incidental blasting except where the classification itself specifically excludes blasting, in which event the payroll for blasting shall be separately stated in the proposal and charged for at the “Blasting” rate. The rate for blasting given in this Manual shall apply to the remuneration of all employees engaged in the storage, handling or use of explosives, including loading, capping, connecting and firing. There shall universally be added to the minimum premium of any compensation policy in which blasting operations are separately rated, the sum of \$25.00 as an additional minimum for this item.

10. **STAMPING** shall include those employees whose principal duties consist of operating power driven machines used for cold blanking, shearing, trimming, drawing, punching or stamping metal, where the operator must place each piece under the die or point of contact at each operation of the press. The rate for the governing classification of the risk shall be the rate for the stamping unless such governing classification specifically excludes stamping, in which event the stamping payroll shall be stated separately and classified and rated under the classification “Stamping—metal.”

11. **RAILROAD HAZARD** shall include those employees who are engaged in the construction, maintenance and operation of the railroad facilities connected with the plant or operation which is the subject of insurance. If the railroad is operated entirely by employees of the assured and exclusively for the purpose of conducting the manufacturing or construction operations which are otherwise the subject of the insurance, and if such railroad has no connection with or entry upon the tracks of any other railroad, then the remuneration of all employees engaged in the operation of such railroad shall be subject to the rate for the governing classification. The remuneration of all employees engaged in the maintenance or construction of such railroad and the remuneration of all employees engaged in operation where the foregoing conditions do not exist shall be

separately stated in the proposal and subject to the rate given in this Manual under the classification "Railroad Hazard—Manufacturers' and Contractors' Risks." Logging railroads are not covered by any of the preceding rules. The entire remuneration of all employees engaged on such railroads shall be separately stated and the rate for logging railroads given in this Manual shall be applicable.

12. ADDITIONS TO, ALTERATIONS AND REPAIRS.—The entire remuneration of all employees engaged in making additions to, alterations or repairs of the assured's existing buildings or plants must be separately stated in the proposal and subjected to the premium rate provided by this Manual.

PAYROLL RULES FOR PUBLIC LIABILITY POLICIES.

The payroll basis for Public Liability policies shall be the same as that required by these rules for Compensation policies except as follows :

Where a Public Liability policy is written in any form, payroll being the basis, if such policy be written concurrently with a Compensation policy, the public liability rates shall not apply to the remuneration of executive officers or clerical office employees ; and if the Public Liability policy written concurrently with a Compensation policy, is also written concurrently with a Teams' Public Liability policy or an Automobile Public Liability policy, the public liability rate shall not apply to the remuneration of drivers or chauffeurs, except for such classifications as specifically require their inclusion. These exclusions shall not affect the coverage afforded by the Public Liability policy, but there shall be no exclusions other than those enumerated.

RATES.

The purpose of the various rates given in this Manual is indicated by an abbreviated title at the head of each rate column. The first rate column bears the heading "Comp." This is an abbreviation of the word "Compensation." The rates in this column cover the liability of the employer either for compensation or for damages for bodily injuries to his employees including the obligation for statutory medical aid. No Compensation policy shall be written to cover any voluntary medical or surgical aid except that expressed in the statutory obligation. These rates provide unlimited coverage as to amount and are to be applied to each \$100.00 of payroll.

The second column is entitled "P.L." which is an abbreviation for "Public Liability." These rates, with exceptions as noted, are also for each \$100.00 of payroll and are available for writing business concurrently with compensation insurance, or independently thereof.

Rates in the P. L. column which do not apply to payroll or to area and frontage are designated viz: (a) which means refer to Home Office, (b) refer to pages 52 and 53.

The rates provided in this Manual for Public Liability cover only claims for damages or bodily injuries to persons not employed by the assured, which injuries are caused by the operations described in the Manual classification. The rates in this Manual do not cover claims for injuries arising from the consumption or use by the public away from the premises described in the policy of any article or product manufactured, handled, or distributed by the assured.

The third column is entitled "Teams" and provides the rate for writing risks upon the Teams' Public Liability form. The rates as expressed are for each team covered by the policy limited to public liability only and include the loading and unloading hazard.

The fourth column is entitled "Auto." which is an abbreviation for "automobile" and indicates the class to which the particular automobile is assigned in the Automobile Manual to which reference should be made in order to determine the proper rate.

The "Comp.", "P. L." and "Teams'" rates are expressed by symbols, the value of which may be ascertained by reference to the state rate sheets which are attached to this Manual.

Rates for Elevator Public Liability insurance will be found on page 28.

LONG TERM POLICIES.

All rates in this Manual, unless otherwise expressly stated, are for one year, and no discounts therefrom shall be made for policies written for a longer term than one year, except as specifically provided in the rules governing Elevator Public Liability and Owners', Landlords' and Tenants' Public Liability Insurance.

MINIMUM PREMIUMS.

A minimum premium is an expression of the lowest premium amount for which a single risk can be written and carried for a period of one year. Where the actual premium computed at the rates is less than the minimum premium, the minimum shall be the controlling premium for the policy, but where the actual premium computed at the rates is more than the minimum, the actual premium shall control. In the event of the cancellation of any policy of insurance where the minimum premium is the controlling premium, if cancelled by the company such cancellation shall be upon the basis of a pro rata amount of the minimum premium for the time the policy was in force. If cancelled by the assured the company shall retain the minimum premium expressed in the policy.

The minimum premium for all Compensation policies shall be \$10.00 except for contractors' policies (contractors' classifications being prefixed by ‡) for which the minimum premium shall be \$20.00. These minimum premiums shall control as to all classifications unless in connection with any given classification a special minimum for that classification is provided in this Manual, in which event the special minimum shall control.

Every Compensation policy in which blasting operations are separately rated shall provide a separate and entirely additional minimum for that item of \$25.00.

The minimum premium for an Owners' or Contractors' Protective Liability policy shall be \$20.00.

The minimum premium for Public Liability policies shall be \$5.00 except in classifications for which this Manual provides a special minimum. In these classifications the special minimum shall control.

The minimum premium for an Owners', Landlords' and Tenants' Public Liability policy on risks other than residences and farms excluding any payroll element and any elevator, shall be \$6.00 per building per annum, except as otherwise provided.

For minimum premiums for residence and farm risks, see "Residence and Farm Rules."

The minimum premium for a Theatre Public Liability Policy shall be \$50.00 per theatre in towns of less than 40,000 population; elsewhere, \$100.00 per theatre. These minimums shall also apply to Moving Picture Theatres.

For minimum premiums for Teams' Property Damage, see "Teams' Property Damage Insurance."

The minimum premium for a Teams' Public Liability policy shall be the annual premium for the highest rated team insured under the policy.

The minimum premium for an Automobile Public Liability policy shall be as provided in the Automobile Manual.

If a public liability policy of any form is written for limits greater than "standard limits" the minimum premium shall be increased in the same proportion as the basis rate.

Where the rules in this Manual provide for a charge for additional interests, the minimum premium for the form of policy used shall be increased in the same proportion.

POLICY LIMITS.

The compensation rates in this Manual provide for insurance without limit as to amount. All other rates in this Manual provide for insurance for "standard limits" (so-called), which limits are \$5,000 for any one person injured and, subject to that amount for each person, a total limit of \$10,000 for any number of persons injured in the same accident. No policy shall be written for limits below standard limits.

The standard limits may be increased by increasing the Manual rate as provided in the following tables of limits. In these tables the Manual rate is 100 per cent and the increases thereon are indicated by the additional percentages. These percentages are expressed in three tables marked respectively "A", "B" and "C."

Classes of risks to which table "A" applies:

Amusement Parks.
Ball Parks.
Blasting.
Billiard and Bowling Halls.
Cartridge Mfg.
Elevators—all classes whether written on an "O., L. and T" form or written separately on an Elevator Public Liability form.
Expositions or Exhibitions.
Fireworks Mfg.
Fuse Mfg.
Gas Works—laying of mains and connections (no tunneling or blasting) including gas explosion, inhalation or asphyxiation.

Gas Works—operating of gas house, maintenance of existing works and mains, and making of house connections, including gas explosion, inhalation or asphyxiation.
Gasoline and Oil Supply Stations (for supplying automobiles and motor boats).
Halls for Lodge Meetings, Banquets and Balls.
Horse Shows.
Moving Picture Shows.
Theatres.
Vessels—all classes.
Wrecking (not marine).

Classes of risks to which table "B" applies:

Advertising Signs—maintenance and operation—all classes.

Apartment Hotels and Hotel Apartments.

Asylums.

Autogenous Cutting and Welding (oxy-acetylene process) including shop.

Baths.

Building Moving.

Building raising and shoring.

Cement Mfg., including quarrying.

Concrete Work—buildings (not grain elevators) reinforced concrete construction, with self-bearing floors or other horizontal surfaces or parts, constructed by means of reinforced concrete.

Concrete Work—Grain Elevators.

Department Stores.

Dry Goods Stores—retail.

Electric Light and Power line construction work exclusively, with erection of poles (not available for division of payroll).

Electric Light and Power Companies—operation, maintenance, extension of lines and making of service connections.

Hospitals.

Hotels.

Iron Work—erecting and repairing balconies, fire escapes,

railings, staircases, coal chutes, iron shutters (outside of buildings).

Iron Work—erecting steel and iron frame structures.

Iron Work—placing iron and steel store fronts as alterations of existing buildings.

Lime Mfg.—including quarrying.

Motion Pictures—production of, in studios and outside—including all operations up to the development of negatives.

Oxy-Acetylene Cutting and Welding (autogenous), including shop.

Quarries—all classes.

Railroad Construction—electric—rail joint welding in street by molten metal or electricity.

Restaurants.

Riding Academies.

Sales Stables—including exhibition and delivery of horses.

Sewer Building—all classes.

Slag—excavation and loading on cars, with or without blasting.

Stone Crushing—including quarrying.

Subways Construction—all classes.

Teams—all classes.

Tunneling—including all work to completion.

Turkish Baths.

For all other classifications of every description, except automobiles, table "C" shall apply.

For Automobiles, SEE AUTOMOBILE MANUAL.

300	136.	143.	146.	149.	151.	152.	153.	154.	155

ADDITIONAL INTERESTS.

Two or more employers, engaged in a common enterprise involving a common payroll and subject to pay compensation, may obtain a compensation policy without additional charge because of the additional interests involved, it being understood that there is but one obligation for compensation, or the employers' liability for damages.

As to all other lines covered by this Manual, no policy shall be written to cover more than one insurable interest, except under and in accordance with rules contained in this Manual. The following general rule shall apply to all classes of risks except such as are insured under the following forms of policy :

Automobile Public Liability Policy

Elevator Public Liability Policy

Owners', Landlords', and Tenants' Public Liability Policy

Theatre Public Liability Policy

for which classes of risks see specific rules applicable to each class.

Liability policies issued to cover more than one person, firm, corporation, or estate shall be considered as written to cover an additional interest, except as follows:

- (a) Policies issued to cover the estate of a deceased person, where an executor or administrator is named, although so expressed as to cover the individual interest of such executor or administrator, involve but one insurable interest.
- (b) Co-owners or partners in the subject matter of the insurance may be covered under one policy as one interest, without additional charge, although the policy is so written as to cover the individual interest of each owner or partner.

Under all other conditions the following percentage shall be added to the Manual rate, or any increase of that rate for increased limits:

For one additional interest,	25%
For two additional interests,	35%
For three or more additional interests,	45%

AUTOMOBILE INSURANCE.

The rules and rates of the Company for Automobile Public Liability insurance, also Property Damage and Collision in connection therewith, are not included in this Manual. Reference is made to a separate Manual for these lines.

ELEVATOR PUBLIC LIABILITY.

An "Elevator" in the sense of this Manual is any platform hoist, operated by muscular or mechanical power, and intended or used for the conveyance of persons or goods, or both. This definition is not intended to include dumbwaiters.

The general elevator classification and rates shall apply to all elevators used for conveying passengers, freight or both (combination) except as modified by the following special classifications.

The following definitions of terms used in special elevator classifications are intended for instruction and guidance in the application of the rates and must be strictly observed.

A "Sidewalk Elevator" is an elevator maintained and operated outside the walls of the building, the platform of which does not rise above the ground or sidewalk level.

A "One-story Elevator" is an elevator maintained and operated within the walls of the building, having a total rise of not more than twenty feet, and having not more than two landings above the bottom of the shaft.

If an elevator, having landings in cellar and at ground floor but no landing above ground floor, also has a landing in a sub-cellar, the total rise of the elevator from sub-cellar to ground floor being not more than twenty feet, such elevator shall be classed and rated as a "One-Story Elevator."

A "Private House Elevator" is an elevator maintained and used in a building occupied by one family only and exclusively as a dwelling.

A "Factory Elevator" is an elevator maintained and used in and for the purposes of manufacturing plants exclusively, by one interest (individual, estate, firm or corporation) for manufacturing or storage purposes.

The following designs of elevators shall be classed and rated as "Factory Elevators" wherever found:

“ Jumper Elevators,” being counterweighted platform (without power) serving but two floors.

“ Man-Hoists,” being of similar design but serving more than two floors.

Man elevating devices (power operated) by means of continuous belt or chain provided with stirrups or small platforms.

A “ Hand Hoist ” is a lifting appliance operated through hatchways and without a platform, operation being by means of hand power, with rope or chain. Hand hoists opening upon the sidewalk shall take the sidewalk elevator rate.

A “ Wool Whip,” is a hoisting device outside of buildings used for hoisting bales of wool or rags.

A “ Storage Warehouse Elevator ” is an elevator maintained and used in buildings where merchandise is stored, but this term shall not include elevators in furniture storage warehouses or any buildings occupied wholly or in part for wholesale or retail sales purposes which are subject to the general elevator rates.

“ Lowerators,” being a trade name for a gravity lowering device with hatchway, shall be rated and classed as elevators under the existing classifications dependent upon location and use.

A “ Dumb-waiter ” is an elevating device operated by hand, designed for conveying limited loads of merchandise or supplies, and so constructed as to make it impossible to carry persons upon it. No premium charge shall be made for a dumb-waiter which fairly falls within this definition.

Elevators with platforms on the outside of buildings, whether operated by mechanical or hand power, shall be classed and rated in accordance with existing elevator schedule dependent upon location and use.

Elevating devices in connection with Blast Furnaces or Ice Harvesting Plants shall not be classed or rated as elevators—no charge being made therefor.

COVERAGE.—The elevator rates in this Manual provide insurance for public liability only. Under no circumstances can compensation insurance be written in or endorsed upon an Elevator Public Liability policy.

LONG TERM POLICIES.—Policies written to cover the public liability upon elevators either under the Elevator Public Liability form, or the O., L. and T. Public Liability form but not otherwise, may be written for a term of three years, and the rates given in this schedule may be discounted 10%, provided the entire three-year premium is paid in advance, or that 50% of such entire three-year premium shall be paid in advance, 30% thereof at the end of the first year and 20% thereof at the end of the second year.

ADDITIONAL INTERESTS.—Elevators insured as such under the rates given in this schedule must not be written to cover more than one insurable interest, except for an additional premium charge of 40% of the premium rate stated in this schedule for one additional interest, 60% for two additional interests, and 75% for three or more additional interests. Such interests may be those of an individual, estate, firm, or corporation, but co-owners may be covered under one policy without additional charge. Policies issued to cover the estate of a deceased person, where an executor or administrator is named, although so expressed as to cover the individual interest of such executor or administrator, involve but one insurable interest.

Where an elevator is insured at the full rate given in this schedule, other policies on the same elevator and for the same limits, but not otherwise, may be issued to other persons in interest for a premium of 50% of the rates given in this schedule, such policy, however, to cover but one interest unless subjected to the rule respecting additional interests; always provided, however, that the company issuing the second policy at reduced rates has previously or concurrently issued a policy upon the same elevator at the full rate required in this schedule. Any such additional policy so written must be made to expire at the same

time with the principal policy, the premium being adjusted pro rata for short terms. If the principal policy provides for greater than standard limits, the second policy may, nevertheless, be written for standard limits, or may be written for the same increased limits as the principal policy, upon the same additional pro rata premium charge, but the second policy cannot be written for limits greater than the principal policy. A tenant of a part of a building using an elevator in common with other tenants who has no control of the elevator whatever, and who does not operate such elevator, may be covered as respects public liability only for 50% of the rate named in this schedule as applicable to such elevator.

The rule contained in the preceding paragraph shall not be available in connection with any risk which is written at reduced rates under the rule for "Landlords' Protective Liability," as contained in the rule immediately following.

LANDLORDS' PROTECTIVE LIABILITY.—If the owner or general lessee of a building or buildings containing one or more elevators, has leased the same entire to another, herein called the tenant, which tenant controls the elevators, operates them exclusively, furnishes power, and has entire charge and control thereof, an Elevator Public Liability policy may be written to cover such owner or general lessee not in possession at 50% of the Manual rate applicable thereto. For the purposes of this rule the 50% reduction herein referred to shall apply, in the case of Factory Elevators, to the symbol "XG". Upon all policies written at the reduced rates provided by this rule the following endorsement shall be attached:

The policy to which this endorsement is attached is issued and accepted at a reduced premium upon the following warranties made by the assured:

- (1) The entire premises are leased by the assured to another herein called the "Tenant."
- (2) The said tenant under such lease has entire charge and control of the premises including elevators and boilers.

- (3) The assured is in no way responsible for maintenance of the premises and the making of repairs, the responsibility therefor resting upon the tenant under the terms of the lease.
- (4) The assured has no employees on or about such premises.
- (5) The conditions herein described will continue during the term of this policy.

GENERAL.—The rates in this schedule for factory or storage warehouse elevators or for hand hoists, power hoists, freight escalators, conveyors and others rated as such are available for writing business only when there is issued concurrently, in the same company, with the Elevator Public Liability policy, a compensation policy and also a general Public Liability policy. Where no concurrent "Comp." or "P.L." is carried, the Factory Elevator rate shall be "XG."

OWNERS', LANDLORDS', AND TENANTS' PUBLIC LIABILITY.

This title will be expressed by the abbreviation "O., L. and T." Public Liability.

O., L. and T. Public Liability policies cannot be written or endorsed to include compensation coverage.

O., L. and T. Public Liability forms and rates may be used to write risks under Manual classifications, the first letter of the symbol in the P. L. column being Y or the P. L. rate designated by (b) but not otherwise.

If, in connection with an O., L. and T. Public Liability policy, compensation coverage is desired, a separate Compensation policy in accordance with the rules and rates in this Manual shall be written concurrently with the O., L. and T. Public Liability policy.

The rates for O., L. and T. Public Liability insurance except as otherwise definitely expressed, are based upon each lineal foot of frontage and each 100 square feet of area, and these rates are in lieu of any other charge for the public liability hazard involved, except as respects elevators.

Elevators must be included at the Manual rates for Elevator Public Liability, or specifically excluded from the policy.

FRONTAGE.—Rate is applicable to each lineal foot of street frontage. Rear buildings having frontage only on alley or court must be written for same frontage rates as if upon street. When an assured not otherwise paying frontage charge on same building occupies a basement, store, or shop, the charge for frontage shall be only on the portion of the entire frontage of the building which he occupies. The frontage charge shall apply to all street frontages, excluding the rear or sides of any building or portion thereof which abuts upon an alley not more than 15 feet wide, from building line to building line. When the assured, not the owner or general lessee, occupies premises above the first floor, no charge shall be made for frontage. When writing sanitoriums, hospitals, schools, colleges, public libraries, public museums or public picture galleries, if the buildings abut upon the street, the charge shall be made upon the entire frontage of the premises, but if they stand back from the street line, the frontage charge shall be made

upon the number of lineal feet in the front of each building in which there is an entrance from the street, except cottages.

AREA.—Rate is applicable to each 100 square feet of the total area. The total area of a building shall be the sum of the areas of each of its floors including any basement floors to which the public is admitted for general trade or business purposes. The area of each floor shall be the number of square feet in that floor computed upon the horizontal dimensions of the building outside its outer walls, no deduction being made for courts if entirely enclosed within the walls of the building, nor in any event for any light, air or elevator shafts. The area shall not include courts which open upon the street or to the rear of the lot upon which the premises are located. Cottages on the same grounds with hospitals, sanitoriums, asylums, schools, and colleges shall be rated as private dwellings.

LONG TERM POLICIES.—O., L. and T. Public Liability policies may be written for a term of three years, with a discount of 10% upon the frontage, area and elevator rates. All the foregoing is with the provision that the entire three-year premium be paid in advance, or that 50% of such entire three-year premium be paid in advance, 30% thereof at the end of the first year and 20% thereof at the end of the second year. Private residence policies shall be written at the full three-year term rate expressed in [this Manual upon payment of the entire term premium in advance.

ADDITIONAL INTERESTS.—An O., L. and T. Public Liability policy cannot be written to include more than one insurable interest, except with an additional premium charge of 40% on all elements of the risk for one additional interest, 60% for two additional interests and 75% for three or more additional interests. Such additional insurable interests may be those of an individual, estate, firm, or corporation, but co-owners may be covered under one policy without additional charge. Policies issued to cover the estate of a deceased person, where an executor or administrator is

named, although so expressed as to cover the individual interest of such executor or administrator, involve but one insurable interest.

Where a risk is insured at the full rate given in this Manual, other policies on the same risk and for the same limits, but not otherwise, may be issued to other persons in interest for a premium of 50% of the rates given in this Manual, such policy, however, to cover but one interest unless subjected to the rule respecting additional interests; always provided, however, that the company issuing the second policy at reduced rates has previously or concurrently issued a policy upon the same risk at the full rate required in this Manual. Any such additional policy so written must be made to expire at the same time with the principal policy, the premium being adjusted pro rata for short terms. If the principal policy provides for greater than standard limits, the second policy may, nevertheless, be written for standard limits, or may be written for the same increased limits as the principal policy, upon the same additional pro rata premium charge, but the second policy cannot be written for limits greater than the principal policy.

LANDLORDS' PROTECTIVE LIABILITY.—If the owner or general lessee of a building or buildings has leased the same entire to another, herein called "the tenant," and the tenant controls the elevators and operates the same exclusively, furnishes power, and has entire charge and control of the premises, an O., L. and T. Public Liability policy may be written to cover such owner or general lessee not in possession at 50% of the rates chargeable for the elements of hazard in such risk, as provided in this Manual, which percentage shall also apply to the minimum premium. Upon all policies written at the reduced rates provided by this rule the following endorsement shall be attached:

The policy to which this endorsement is attached is issued and accepted at a reduced premium upon the following warranties made by the assured:

- (1) The entire premises are leased by the assured to another herein called the "Tenant".
- (2) The said tenant under such lease has entire charge and control of the premises including elevators and boilers.

- (3) The assured is in no way responsible for maintenance of the elevator and the making of repairs, the responsibility therefor resting upon the tenant under the terms of the lease.
- (4) The assured has no employees on or about such premises.
- (5) The conditions herein described will continue during the term of this policy.

The rule contained in the preceding paragraph shall not be available in connection with any risk which is written at reduced rates under the rule for "Landlords' Protective Liability," as contained in the rule immediately following, nor to private residences.

Agents and owners having care, custody, control and operation of buildings are insurable only as owners at the rates and under the rules governing owners, but if a policy be issued to cover both owner and agent, such policy shall be written under the rules governing "Additional Interests".

GENERAL.—Where buildings are occupied in part as stores, with dwellings above, if the assured occupies the stores or any of them, the rate for stores must apply to the store portion, and the rate for apartments or tenements to the balance. In the case of an assured who is sole tenant of a building occupying same partly for residence purposes and partly for office, mercantile or manufacturing purposes, the risk may be rated: (a) that part of the premises occupied for residence purposes by the assured at the rate for Apartments—tenant's risk only. (b) The remainder of the premises occupied for office, mercantile or manufacturing purposes, at the proper rate for such occupancy. If a policy be written to cover a building in which a theatre, concert hall, or other place of public amusement is contained, but there are in the building such occupancies as hotels, stores, offices, or apartments, the theatre, concert hall or place of amusement must be written in accordance with the theatre rule and the balance of the risk at the proper rates as given in this Manual.

The classification on page 83 of the Manual reading "Dwellings of every description when occupied by three or more families, and buildings occupied partly for residence purposes by one or more families and partly for store, office or mercantile purposes" shall include all buildings occupied as boarding or furnished room houses.

RESIDENCE AND FARM INSURANCE.

PRIVATE RESIDENCE.—For the purposes of this Manual a private residence is defined as:

- (a) A single building designed for and occupied as a residence by not more than two families, together with the land upon which it is situated if not in excess of five acres, also including barns, stables, garages and customary outbuildings so far as they are used for household purposes but not for business purposes;
- (b) A tenement, flat or apartment definitely described as a part of any building if occupied as a residence by not more than one family.

The private residence of a physician, surgeon or dentist in which there is maintained office quarters for professional purposes, no other portion of the residence except such office being used for professional purposes, shall be classified and rated as a private residence under these rules. In the event of such occupancy, however, a policy covering public liability shall exclude injuries to patients directly or indirectly due to such professional occupancy.

FARM.—A tract of land of more than five acres, cultivated in whole or in part for farming purposes, and with or without a private residence. This term shall also include general and special purpose farms and private estates.

PRIVATE CHAUFFEUR.—Any person employed as a chauffeur whose duties include the operation, maintenance or repair of any private automobile. This definition shall exclude all employment upon public or commercial automobiles.

OUTSERVANT.—Any person employed for household, domestic or farm service exclusively, whose principal duties are performed outside the residence. Chauffeurs not included.

INSERVANT.—All employees in household, domestic or farm service, not otherwise defined, whose principal duties are performed inside the residence. This term shall include cooks, laundresses, maids, butlers, seamstresses, nurses, companions, governesses and all other employees performing duties of a domestic character principally within the residence of the employer, by whatever name or term they may be designated.

OCCASIONAL SERVANTS.—Shall include those employed either as “Outservants” or “Inservants” (not chauffeurs) whose employment is not continuous, but whose duties are a regular and continuing part of customary household, domestic or farm duties. This term may be illustrated by, but is not limited to, such employments as a laundress for certain days in the week, or a choreman who takes care of the furnace, removes ashes, shovels snow in season, cuts the lawn in season, and does other work of this character, using as much time and at as frequent intervals as the requirements of the work make necessary.

COMPENSATION.—For the purposes of these rules this term shall mean the obligation imposed by law upon the employer for compensation or damages for personal injuries to an employe arising out of and in the course of his employment. It shall also mean the obligation assumed by an employer to pay to injured employes or their dependents the benefits provided under the Workmen’s Compensation law.

EMPLOYERS’ LIABILITY.—For the purposes of these rules shall mean the liability imposed upon an employer for injuries sustained by employees by reason of the negligence of the employer and which injuries are not compensatable under any Workmen’s Compensation law.

PUBLIC LIABILITY.—The obligation of the assured for damages for personal injuries sustained upon the insured premises or adjoining public ways by any person or persons not employed by the assured.

RULES.

The compensation obligation shall include all persons in the service of the assured, employed in connection with a private residence or farm.

Policies may be issued to cover both husband and wife as assured without additional charge. If interests other than that of husband and wife be joined in the policy, the rules expressed elsewhere in this Manual as regards "Additional Interests" shall apply.

The policies shall cover the maintenance, operation, use and occupancy of the premises, including ordinary repairs and alterations, but not new construction work of any kind, nor the demolition of existing structures. Such construction work and demolition shall be separately covered upon notice to the Company, at the proper premium charge, and in accordance with the Manual rules and rates.

Policies involving per capita charges will be issued to cover the servants employed at the time of issue. If during the period of the policy, added outservants or inservants are employed, or those previously employed are dismissed and not replaced, statements shall be made to the Company at the end of the period, and pro rata premium payment made for each such added servant, or allowed for each such dismissed servant, to the end that the premium upon adjustment shall represent a premium charge as in the policy provided for each servant employed according to the term of such employment. Pro rata premium charge shall not be less than twenty-five (25) per cent of the annual per capita charge for each servant.

In the case of chauffeurs who have been in assured's employ for a period less than the entire policy term, charge shall be computed on a short rate basis upon the annual per capita premium, but in no case shall such charge be less than 50% of the annual premium for each chauffeur so employed.

Servants need not be named, and the substitution of one servant for another in the same line of duties requires no notice to the Company and no change in the policy.

RATES—PRIVATE RESIDENCES.

In compensation states in which the compensation law definitely excludes domestic servants, and where the employer does not desire to provide voluntary compensation, a general liability policy may be issued to cover private residences and provide protection against both employers and public liability, but expressly excluding all obligation for compensation.

The premium charge for public liability only, exclusive of either employers' liability or compensation, shall be \$3.00 per residence, per annum, or \$7.50 for three years.

The premium charge for employers' and public liability combined, shall be \$4.00 per residence, per annum or \$10.00 for three years.

Under all other conditions a private residence policy shall be issued which covers the compensation obligation of the employer as herein defined only, or which covers both such compensation obligation and the public liability of such employer, or which covers the public liability of such employer only, each form of coverage being governed by the premium rates as applicable thereto.

For "Compensation" either written separately or in connection with public liability, the following annual premium charges per capita shall be made:

	No.	Symbol
Private Chauffeurs, each.....	0911	VA
Outservants, each.....	0912	VB
Inservants, each.....	0913	VC

Occasional Servants.—If a fair average estimate of the time during which an occasional servant is employed shall be one-half or less of the customary full time, then the premium charge shall be half of the annual per capita charge for an Inservant or an Outservant dependent upon the nature of employment of the Occasional Servant. If a fair

and reasonable estimate of the amount of time devoted by an Occasional Servant shows that more than one-half the customary full time is so engaged, then the premium rate for such Occasional Servant shall be the full rate for an Inservant or Outservant dependent upon the nature of the employment of the Occasional Servant.

RATES—FARMS.

In compensation states in which the compensation law definitely excludes farm labor, and the employer does not desire to provide voluntary compensation, an employer's liability policy may be written to cover a farm as herein described, provided all the labor employed upon that farm is strictly within [the statutory exclusion, and there is no law or requirement in the state making the issuance of a policy excluding compensation illegal or improper. Such policies, when issued, shall by endorsement or in some other manner, and in definite terms, exclude all obligations for compensation. If any part of the labor upon any farm is not excluded from the compensation act, payroll cannot be divided, but a compensation policy must be issued to cover all employees.

For employers' liability (standard limits of 5/10,000) written either with or without concurrent public liability, the following premium charges for each \$100 of actual wages determined as hereinafter provided shall be made:

	Symbol
For all employees of whatever nature, excluding only clerical office force.....	CA
For clerical office force (if any).....	AE

Under all other conditions a farm policy shall be issued which covers the compensation obligation of the employer as herein defined only, or which covers both such compensation obligation, and the public liability of such employer, or which covers the public liability of such employer only, each form of coverage being governed by the premium rates hereinafter contained as applicable thereto.

For "Compensation" either written separately, or in connection with public liability, upon risks in which the estimated annual payroll is not in excess of \$5,000, the following annual premium charges per capita shall be made:

	No.	Symbol
Private Chauffeurs, each.....	0901	VA
Outservants, each.....	0902	VB
Inservants, each.....	0903	VC

If occasional Inservants or Outservants, as herein defined, (not chauffeurs) are employed upon the farm at any time during the term of the policy, the premium rate for such occasional servants shall be based upon the actual earnings of such occasional servants during the term of their employment, in lieu of the per capita charge hereinbefore provided. The assured shall be required to keep an actual account of the wages paid to such occasional servants. These wages shall include, in addition to the actual cash wages, the real value of any other consideration, such as board, lodging, store certificates, etc., which is a substitute for cash wages. When the wage agreement with an occasional servant includes board, lodgings or both, the actual wages shall be determined by adding to the cash wages one-third of the amount thereof, and the actual wages thus determined shall be the basis for the premium charge. Wherever any other valuable substitute for wages is used, the true value of such substitute so far as it can be ascertained shall be added to the cash wages to produce the actual wages. The premium rate for occasional servants for each \$100.00 of actual wages shall be CF.

For "Compensation" either written separately or in connection with public liability on risks in which the estimated annual payroll is \$5,000 or more, the following premium charges for each \$100.00 of actual wages determined as provided by the preceding rule shall be made:

For all employees of whatever nature engaged upon or in connection with such farm, including Chauffeurs, Outservants, Inservants, Occasional Servants, also Managers, Superintendents and Foremen if engaged wholly or partly in field work	No.	Symbol
	0006	CF
For clerical office force (if any)	8810	AE

The assignment of a risk to one of the two methods of rating above provided for shall depend entirely upon the estimated annual payroll upon which advance premium is paid, but if the actual annual payroll, determined by audit at the end of the policy period, shall show that the risk should have been rated in the other class, the policy then expired shall not be changed, but a renewal can only be issued upon the form of rating to which the risk is entitled by reason of its actual payroll for the preceding year. This actual payroll shall become the estimate for the renewal.

The premium charge for Public Liability only, exclusive of either employers' liability or compensation, shall be as follows:

For each residence, whether occupied by the assured or by employees or tenants of the assured with a tract of land not exceeding five acres with each residence, \$3.00 for each residence per annum, or \$7.50 for three years, in addition to which there shall be a further public liability charge of five cents per acre, per annum, up to and including 1,000 acres, and a charge of two cents per acre, per annum, in excess of 1,000 acres, for all land in excess of the five acres allowed for each residence.

MINIMUM PREMIUMS.

The minimum premium for a compensation policy, either upon a private residence or farm, if no concurrent public liability policy is issued, shall be \$6.00 per annum. If concurrent public liability is issued, and the compensation policy is based in whole or in part upon per capita charges, the minimum annual premium shall be computed as follows: for the compensation portion as represented by per capita charge, the lowest annual per capita charge used in the policy, but if such lowest per capita charge is the charge for one or two inservants, the total per capita charge for two shall be the minimum. If a policy is issued upon a farm, and there is a premium charge made upon the payroll for occasional servants, there shall be entered as a further minimum beyond the per capita charge, the amount which would be produced by applying the rate to a minimum payroll of \$200.00. In all policies there shall be added also, as a part of the minimum premium for public liability, the sum of \$3.00. The minimum premium for an employers' liability policy on a farm shall be \$10.00.

TEAMS' PUBLIC LIABILITY.

The Teams' rates provided in this Manual cover Public Liability only for the maintenance, use and operation of teams, and include the loading and unloading hazard. No discount shall be allowed for the elimination of this hazard.

No Teams' Public Liability policy shall be written to include accidents to the driver or to any other employees engaged in connection with teams.

If compensation insurance on drivers and other persons employed upon teams is written, the payroll of such employees must be included at the rate for "Drivers and Drivers' Helpers" provided in this Manual, except for those classifications which by their phraseology require the inclusion of drivers and drivers' helpers at the compensation rate for the classification.

If the assured has no employees other than drivers and helpers, then a separate compensation policy shall be issued covering such employees.

For those classifications, the phraseology of which requires the inclusion of drivers and drivers' helpers, it is not permissible to issue Teams' Public Liability policies without concurrent Public Liability coverage.

Where teams including drivers are employed under a contract with the owner of such teams for a consideration, only a portion of which is the actual payroll of the drivers, one-third of the actual amount paid for such teams under the contract with the owner shall be considered as the payroll of the drivers and included in the payroll to which the compensation rate is applicable.

Opposite certain classifications in this Manual there appears in the Teams' rate column a dash (—) indicating that no teams are used or that if teams are used the symbol R will apply.

For certain other classifications in the Teams' rate column more than one symbol appears. For explanation of the purpose of such symbols, see page 51.

There are certain classes of Teams' risks which cannot be assigned to Manual classifications. A list of such risks with rate symbols follows :

	No.	Symbol
Ambulances.....	7250	LA
Baggage Transfer.....	7251	MC
Bicycle Delivery Vehicles.....	7252	T
Furniture Moving Vans or Trucks.....	7253	P
Hand Trucks—not peddlers' trucks.....	7254	U
Hired Teams—see rule below.....	7255	
Ice Cream Dealers.....	7256	NA
Mail Wagons.....	7257	KC
Newspaper Delivery.....	7258	KB
Omnibus Lines—operating in cities and towns exclusively, passenger risk included	7259	KA

For excluding passenger risk, a discount of 25% may be allowed.

For Stage lines which may operate partly or entirely outside of cities and towns, the rate excluding passenger risk shall be the same as for "Omnibus Lines" as above indicated. If passenger hazard is to be covered, the sum of \$100.00 must be added to the rate for each team regardless of location.

Physicians' Vehicles—for one horse.....	7260	RD
Physicians' Vehicles—for each additional horse	7261	UA
Piano Movers.....	7262	P
Private Vehicles—for one horse.....	7263	TA
Private Vehicles—for each additional horse..	7264	U
Public Service Vehicles—all classes	7280	MA

A discount of 20% will be allowed from public service vehicle rates for the elimination of the passenger hazard.

Push Carts.....	7265	U
Railway Iron	7266	P
Saddle Horses—For each saddle horse whether ridden by employees of assured or rented to or ridden by others.....	7267	UA
Street Sprinklers	7268	R
Structural Iron and Steel	7269	P
Truckmen	7208	OE
Undertakers' Hearses and Coffin Wagons....	7270	R

HIRED TEAMS.—Persons hiring teams from other parties shall pay full Teams' rate, in accordance with the classification provided therefor, except when the owner of such team is already carrying insurance thereon, in which event, the persons hiring the team may be insured at 25% of the full Teams' rate, provided the assured warrants that insurance will be maintained by the owner on the same teams at full Manual rates, and further provided, that the assured's name does not appear upon the vehicle. If the assured's name does appear upon the vehicle, he may be insured at 25% of the full Teams' rate, provided the owner of such team is already carrying insurance at full rates with this Company.

In rating general truckmen's risks, the Manual rate for this classification must be strictly adhered to, except under the following conditions:

If a truckman is engaged wholly in trucking for one concern, and the interest of that concern is included as an additional assured at the proper additional premium charge, the basic rate will be the rate applicable to the business in which the user of the team is engaged.

If a truckman carts for more than one concern and the interest of each of the users is included as an additional assured, and provided the number of teams used for each concern can be definitely established, the rule expressed in the foregoing paragraph would prevail.

If a portion of a truckman's equipment, the number of which can be definitely established, is used wholly by certain concerns and the number of teams used by each concern is definitely established, and the interests of the concerns, for whom the trucking is done, included as additional assureds, the rate applying to the business in which the users are engaged would apply to such teams, and the remainder of the truckman's equipment must be written at the rate for truckmen. The additional interests must always be endorsed to expire concurrently with the Teams' policy.

Where the additional interest or interests of users of teams is not covered, the Manual rate for truckmen must apply in all cases, whether or not assured trucks entirely for one or more concerns.

SPECIAL—Horses owned by assured but rented out to others, with vehicles attached, may be covered, while such horses and vehicles are not in charge of the assured or any of his employees, at a rate of \$5.00 per horse per annum. Horses (not saddle horses nor horses rented with vehicles) which assured hires or furnishes to others, may be covered while not in charge of the assured or any of his employees at \$2.00 per horse per annum.

TEAMS' PROPERTY DAMAGE INSURANCE—RULES AND RATES.

This is a term adopted to designate insurance to provide against loss arising from the liability of the assured for damages by reason of injury to or destruction of property of any or every description (not, however, the property of the assured or the property of others when in the care of the assured or any of his employees, nor carried in, upon or by the vehicles covered) due to the ownership, use or maintenance of the teams. This form of insurance can only be written concurrently with a Teams' policy.

The rate for covering such property damage up to a limit of \$1,000.00, shall be 20% of the premium charged for the team so covered with a minimum premium for this feature of \$5.00 per team, per annum in cities having a population as shown by the census of 1910, of 250,000 or over, and of \$3.00 per team, per annum elsewhere. Such property damage may be written upon bicycle delivery vehicles (not motor cycles) for the same limits, for a minimum of \$2.00 per bicycle regardless of the location in which the coverage is provided. Insurance in excess of a limit of \$1,000.00 may be written for an additional premium, equal to 3% of the premium charged for such \$1,000.00 limit for each \$100.00 in excess of \$1,000.00 and not in excess of \$2,000.00. For each \$100.00 in excess of \$2,000.00 there shall be a further premium charge equal to 1½% of the premium charge for the first limit of \$1,000.00.

THEATRE PUBLIC LIABILITY INCLUDING MOVING PICTURE SHOWS.

Theatre Public Liability policies cannot be written or endorsed to include compensation coverage. If in connection with a Theatre Public Liability policy, compensation coverage is desired, a separate policy in accordance with the rules and rates in this Manual shall be written concurrently with the Theatre Public Liability policy.

The rates for Theatre Public Liability risks, including moving picture shows, are based upon the seating capacity. These rates are in lieu of any other charge for the public liability hazards involved, except elevators. Elevators must be included at the Manual rate for elevator public liability or specifically excluded from the policy.

LONG TERM POLICIES.—Theatre Public Liability policies may be written for a term of three years with a discount of 10% upon the seating capacity and elevator rates. All the foregoing is with the provision that the entire three-year premium be paid in advance, or that 50% of such entire three year premium be paid in advance, 30% at the end of the first year, and 20% at the end of the second year.

ADDITIONAL INTERESTS.—A Theatre Public Liability policy cannot be written to cover more than one insurable interest except with an additional premium charge of 40% on all elements of the risk for one additional interest, 60% for two additional interests, and 75% for three or more additional interests. Such additional insurable interests may be those of an individual, estate, firm or corporation, but co-owners may be covered under one policy without additional charge. Policies issued to cover the estate of a deceased person, where an executor or administrator is named, although so expressed as to cover the individual interest of such executor or administrator, involve but one insurable interest.

LANDLORDS' PROTECTIVE LIABILITY.—If the owner or general lessee of a theatre has leased the same entire to another, herein called the "Tenant" and the tenant

controls the elevators and operates the same exclusively, furnishes power and has entire charge and control of the premises, a Theatre Public Liability policy may be written to cover such owner or general lessee not in possession at 50% of the rates chargeable for the elements of hazard in such risk as provided in this Manual, which percentage shall also apply to the minimum premium. Upon all policies so written an endorsement shall be attached stating the existence of the conditions above described and that such conditions will continue during the term of the policy; also that the assured has no employees on or about the premises and is in no way responsible for the maintenance of the premises and the making of repairs. Agents and owners having care, custody, control and operation of theatres, are insurable only as owners at the rates and under the rules governing owners but if a policy be issued to cover both owner and agent, such policy shall be written under the rules governing "Additional Interests."

GENERAL.—If the building in which a theatre, concert hall or other place of public amusement is maintained, is occupied in part by hotels, stores, offices or apartments, the theatre, concert hall or place of amusement must be written in accordance with the Theatre Public Liability rule and the balance of the risk in accordance with the rules governing the writing of "O., L. and T." insurance.

THEATRE RATES.

It is recognized that there are many conditions surrounding a theatre which influence the rate to be charged for Theatre Public Liability insurance. The rates contained in this Manual are basis rates and policies must be issued at such rates. The rates are subject to adjustment in accordance with the Universal Analytic Schedule—Theatre Form.

MOVING PICTURE SHOWS—Public Liability rate per seat, per annum.....	.20
THEATRES, OPERA HOUSES OR HALLS—Public Liability rate per seat, per annum.....	.10

NOTE.—The premium shall be based upon each seat on the main floor and in each gallery irrespective of the number of entertainments given.

OWNERS' OR CONTRACTORS' PROTECTIVE LIABILITY.

COVERAGE.—An Owners' or Contractors' Protective Liability policy cannot be issued to cover operations performed by direct employees of the assured and shall exclude any obligation for workmen's compensation.

PERCENTAGE CONTRACTS.—If an owner employs a contractor, or a contractor employs a sub-contractor on the "Percentage Basis" so-called, it is probable that the relations will be those of principal and agent and that the employees of the contracting agent may under some circumstances at least be held to be the employees of the principal. It is necessary that this condition be provided for by compensation and public liability insurance issued jointly to the contracting parties, and such joint insurance shall be considered as covering only one interest and requiring but one premium charge. Therefore, where the percentage arrangement exists, the obligations of the owner or contractor who is in the position of principal must be included with the obligations of the contractor who is in the position of an agent, and for insurance purposes only, these parties shall be considered joint employers with but one insurable interest involved. If any of the work is sub-let by the principal or contracting agent, a Protective Liability policy may be issued as respects such work so sub-let as hereinafter provided.

All protective premium rates herein provided are to be applied to the total cost of all work let or sublet, including all labor, material, and equipment used or delivered for use in the execution of such work, whether furnished by the owner, the contractor, or the sub-contractor, also all allowances, bonuses, or commissions made, paid or due.

1. Owners' protective insurance not available to contractors and covering all work provided for under contract or contracts with the owner, but not on a percentage basis.

(a). Where the owner furnishes no material, tools, or equipment, rate for each \$100.00 of the total cost of the work let or sublet, 10 cents.

(b). If the owner furnishes any portion of the material or equipment, for each \$100.00 of the total cost of the work let or sublet, 20 cents. This rule shall not apply if the material furnished is exclusively intended and used for interior trim or finish, or if the material furnished is for interior decoration or ornamentation, or if the material furnished consists of interior fixtures, appliances or conveniences, or if the material furnished consists of builders' hardware. This rule shall apply, however, if materials other than those enumerated are also furnished, which materials go into the structural portions of the building, in which event the rate provided in this rule shall apply to the total cost of all work sublet. Under no circumstances shall a Protective Liability policy carry more than one premium rate. If the conditions with these modifications do not permit the writing of the entire risk under subdivision (a) foregoing, then the entire risk shall be written under this paragraph and at the rate herein provided.

(c). If the owner employs any superintendent, watchman or laborers on the premises, these employees must be covered by means of compensation and public liability insurance according to the rules and rates contained in this Manual.

(d). If the owner of land makes a long term lease to another, the lessee to erect a building upon the land, the owner of the land having no relation to or connection with the work of construction, a protective policy to cover such lessor during the construction of the building may be written at a rate of 2½ cents for each \$100.00 of the total cost of the building as hereinbefore provided. The policy, however shall be endorsed to express these existing conditions.

2. Contractors' protective insurance covering work to be performed under sub-contract or sub-contracts except upon the percentage basis, for which see previous rule.

(a). If the contractor does not furnish any material, tools, or equipment for the use of any sub-contractor, charge, for each \$100.00 of the total cost of the work sublet, 12½ cents.

(b). Where the contractor furnishes any portion of the material, tools, or equipment for use of any sub-contractor, charge, for each \$100.00 of the total cost of work sublet, 25 cents. This rule shall not apply if the material furnished is exclusively intended and used for interior trim or finish, or if the material furnished is for interior decoration or ornamentation, or if the material furnished consists of interior fixtures, appliances or conveniences, or if the material furnished consists of builders' hardware. This rule shall apply, however, if materials other than those enumerated are also furnished, which materials go into the structural portions of the building, in which event the rate provided in this rule shall apply to the total cost of all work sublet. Under no circumstances shall a Protective Liability policy carry more than one premium rate. If the conditions with these modifications do not permit the writing of the entire risk under subdivision (a) foregoing, then the entire risk shall be written under this paragraph and at the rate herein provided.

(c). If the contractor employs any superintendent, watchmen or laborers upon the premises, or undertakes the actual performance of any portion of the work, such employees and such work must be covered by means of compensation and public liability insurance under the rules and rates given in this Manual.

3. Contractors engaged in setting boilers or engines under contract with manufacturers or purchasers, rate to be applied to the entire cost of the contract work exclusive of the cost of boilers, engines or appliances thereof furnished by the manufacturer—protective liability rate, covering the manufacturer or owner, but not the contractor, \$1.50.

REMOVAL PERMITS.

Permits for the removal of mercantile establishments to new locations may be attached to O., L. and T. Public Liability policies under the following conditions:

- 1st. The policy or policies shall cover old and new locations during the period of removal.
- 2d. There shall be a flat premium charge for the hazards of removal not herein excluded, of \$15.00 for a term of not exceeding three days. An additional premium of \$3.00 per day shall be charged for every day or portion of day in excess of three.

These permits shall exclude the hazards of transportation between the old and the new locations, which shall be covered only by a Teams' Public Liability policy at the proper rate.

SPECIFIC INSTRUCTIONS TO AGENTS GOVERNING USE OF MANUAL.

In the preparation of this Manual the schedule arrangement of classifications has been superseded by an alphabetical arrangement.

In the rate columns will be found symbols representing the rates applicable to each classification for Compensation, Public Liability, Teams' Public Liability and Automobile Public Liability. At the back of the Manual will be found rate sheets indicating the values for said symbols except Automobile Public Liability for which refer to the Automobile Manual. It will be observed that certain symbols on the rate sheets are marked with an (x), and in the note reference is made to rate sheets entitled "Exceptions". These exceptions are classifications which have been given individual treatment in the case of the particular state to which the rate sheet applies. The rates for such classifications will be found on the "Exceptions" rate sheets. Certain classifications are more or less peculiar to individual states and these special classifications, if any, will be found on a separate rate sheet.

Certain classifications are designated in the rate columns by (a) or (b). (a) means "refer to Home Office" and agents must understand that they are not permitted to make quotations for risks falling under such classes without reference to the Home Office. (b) means "refer to pages 52 and 53 of the Manual" where will be found specific instructions as to the rate treatment to be accorded classifications so designated.

In the "Teams" and "Auto" columns there will be found opposite certain classifications hyphenated symbols. These symbols indicate that there may be two classes of teams or automobiles used in connection with the risk. In such cases it is required that the teams or automobiles be classified and the proper Manual rate applied to each class.

In the rating of teams' risks, special attention is called to the list of teams with their symbols enumerated on page 39.

If the agent has any doubt as to the proper classification of a teams' or automobile risk, the risk with full particulars should be referred to the Home Office.

The column designated "No." is for Home Office use and has no relation to the rating of risks.

CLASSIFICATIONS WHICH ARE DESIGNATED BY (b) IN P. L. COLUMN SHALL BE RATED AS FOLLOWS:

Advertising Signs.

Electrical Signs—including maintenance and operation, per hundred sq. ft.	\$2.00
Roof Signs—other than electrical signs, per hundred sq. ft.	2.00
Signs fastened on walls of buildings, per hundred sq. ft.	1.00
Street or Highway Signs or Bulletins, per hundred sq. feet.25
Signs in fields and vacant lots, per hundred sq. ft.10
Minimum premium, \$6.00 per policy.	

Automatic Slot or Vending Machines, operation of (excluding installation in place, repair and taking down) per machine, per annum10
--	------------

Baseball Clubs and Parks.

Basis of premium computation—per \$100 of gate receipts50
Minimum premium per season or year—in cities with population of 100,000 or over, \$250.00 per park. Elsewhere, \$100.00 per park.	

Bath Houses and Bathing Pavilions—Beach.

Basis of premium computation—per \$100 of gross receipts50
The minimum premium per season or year shall not be less than an amount equivalent to 10 cents for each dressing room.	

Churches.

Flat premium charge per annum :	
In cities with population of 100,000 or over	50.00
Elsewhere	25.00

Dance Halls, including dance floors, galleries and instruction rooms.

Basis of premium computation—per \$100 of admission receipts :	
When alcoholic liquors are served on the premises, minimum annual premium, \$50.00, rate	2.00
When no alcoholic liquors are served on the premises, minimum annual premium, \$25.00, rate	1.00

Dog Shows. Rate as "Horse Shows."

Exhibitions — Agricultural, Horticultural or Industrial, in halls, theatres or auditoriums:

Basis of premium computation—per \$100 of gate receipts50
---	-----

Minimum premium for term of policy, which term shall include but one continuous exhibition—in cities with population of 100,000 or over, \$125.00. Elsewhere, \$50.00.

These minimum premiums are not subject to short rate or pro rata adjustment.

Golfers.

A Public Liability policy may be issued to an individual golfer insuring him against loss by reason of his liability for accidents suffered by any person, including his caddy, club members, club employees, fellow players and general public, for limits of \$5,000 for one person injured and \$10,000 for any one accident in which more than one person is injured.

Premium for one-year policy.....	3.00 ★
----------------------------------	--------

Premium for three-year policy.....	7.00	★
------------------------------------	------	---

Horse Shows—in halls, theatres or auditoriums exclusively.

Basis of premium computation—per \$100 of gate receipts.....	1.00
--	------

Minimum premium for term of policy, which term shall include but one continuous exhibition, in cities with population of 100,000 or over, \$125; elsewhere, \$50. These minimum premiums are not subject to short rate or pro rata adjustment.

Lunch Wagons, including hauling to and from the place of business, rate for each, per annum.....	10.00
---	-------

Skating Rinks—Ice or Roller.

Basis of premium computation—per \$100 of admission receipts, including receipts from the hiring of skates.	.50
---	-----

Minimum premium per season or year, \$125 for each rink in cities with population of 100,000 or over; elsewhere, \$50. These minimum premiums are not subject to short rate or pro rata adjustment.

† Electric Light and Power line construction work exclusively — on transmission lines not intended for local distribution	7530	DE	ZP MA/R 4/1
† Electric Light and Power line construction work—excluding transmission lines not intended for local distribution (not available for division of payroll)	7534	DE	ZU MA/R 4/1
† Electric Light and Power Companies—operation, maintenance, extension of lines, and making of service connections (see notes below.) . . . Public Liability minimum premium, \$100.00.	7531	DE	ZW MA/R 4/1
† Electric Light and Power Companies—operation, maintenance, and extension of transmission lines (not for local distribution) (see notes below) Public Liability minimum premium, \$100.00.	7532	DE	(a) MA/R 4/1

The two preceding classifications require that all payroll including that expended for line construction shall be subject to the rate of the classification, unless the assured maintains an entirely separate department for installing electrical equipment which is operated by a separate set of employees who are at no time engaged in connection with the operation of the power plant in any capacity. In such cases the payroll of such employees shall be separately stated at the Manual rates for the kind of installation work performed.

Under no circumstances shall this rule be interpreted to mean that the payroll of the linemen may take any rate other than the operative rate of the plant.

Manufacturing or mercantile plants engaged in generating electricity and supplying the same or any part thereof to other plants or buildings

Classification

No. Comp. P.L. Teams' Auto.

This classification is available only when employees engaged in the yard are not exposed to the quarry hazard. If the stone yard employees are so situated as to be exposed to the quarry hazard, such employees shall take the quarry rate.

For public insurance on a risk falling under above classification where the plant is occupied in part by tenants also engaged in similar work, there shall be in all cases, in addition to the public liability rate charged on payroll, a charge of \$1.00 for each tenant or employee of a tenant subject to a minimum charge for this item of \$3.00 per policy.

Theatre Companies. Rate applicable to players or entertainers only: For operas, dramas, and comedies.	9153	AS	(a)	R	5
For vaudeville, burlesque, farce and continuous performance.....	9151	BF	(a)	R	5
The above classification does not apply to vaudeville, burlesque, farce and continuous performance where motion pictures are exhibited more than once during any one performance.					
Motion Picture Theatres—Rate to apply to all employees of the theatre.....	9152	BV	†	R	5
Any theatre showing moving pictures throughout its entire performance or more than once during any performance, regardless of admission fee charged, shall be classed and rated as a motion picture theatre.					
Premium Computation Basis.—The actual remuneration of players or entertainers must be used unless the amount exceeds \$100 per week, in which event that sum shall be used as representing the actual weekly remuneration of each player or entertainer provided that, subject to the above limitation, the payroll basis for vaudeville, burlesque, farce and continuous performance players shall be the amounts paid by the theatres for each act.					
Theatre employees, including managers (not stage managers) box office employees, ushers, and others not employed upon the stage, but excluding care, custody and maintenance of premises.....	9154	AS	†	R	5

†If public coverage is required, Theatre Public Liability policy must be issued.

See Division of Payroll Rules, pages 7 to 11 inclusive.

Classification
